Final-Year B.Tech CSE, Amrita Vishwa Vidyapeetham · IIT Madras Diploma in Data Science · Full-Stack | AI/ML | Data Science

PROFESSIONAL SUMMARY

I am a driven computer science enthusiast with a strong foundation in data science and business analytics. I am committed to continuous learning and aim to contribute to impactful, data-driven solutions that enhance user experience and support organisational growth.

EDUCATION

Amrita Vishwa Vidyapeetham, Coimbatore B.Tech in Computer Science & Engineering CGPA: 8.66/10	2023 – 2027
Indian Institute of Technology Madras (Online Degree) Diploma in Data Science CGPA: 7.25/10	2023 – 2025
VMJ Higher Secondary School, Madurai 10th: 97% 12th: 94.2%	2020 – 2023

TECHNICAL SKILLS

Primary: Python, C++, SQL, TypeScript, Java, Go, C
Frameworks: PyTorch, FastAPI, LangChain, LangGraph, XGBoost, SHAP, scikit-learn, React, Node.js, Next.js, Pandas, NumPy
Infrastructure: Docker, AWS EC2, PostgreSQL, Redis, GitHub Actions (CI/CD), REST API design, Microservices Architecture
AI / ML: Transformers, BERT, LSTM, CNNs, Feature Engineering, Model Validation, Explainable AI (SHAP), Statistical Modelling

EXPERIENCE

Product Intern — Software & ML Engineering Full-Stack / ML | Apr – May 2026
Nalass Inn Ruchee Catering, Coimbatore

- Eliminated inventory over-booking entirely by architecting atomic SQL transaction flows with automated compensating rollbacks across a 6-module microservices system (PostgreSQL + Node.js), reducing end-to-end lifecycle management time by ~40%.
- Guaranteed 100% order processing availability by engineering a scikit-learn ML microservice for ingredient and labour cost prediction, backed by a resilient Node.js fallback layer handling all order volumes without downtime.

Product Intern — Business Intelligence Data Science / Analytics | May – Jun 2025
SSR Plastics, Madurai

- Reduced manual pricing review time by ~60% by deploying an Isolation Forest anomaly detection pipeline with real-time alerting; cut monthly reporting effort from 2 days to 2 hours via an automated multi-page PDF generation engine.
- Improved supply chain decisions for 20+ dealers by building predictive data pipelines (Facebook Prophet + K-Means) delivering 90-day price forecasts, automated supplier scorecarding, and dealer churn risk assessments.

PROJECTS

Credit Risk Scoring Engine [\[GitHub\]](#) Python · XGBoost · SHAP · FastAPI · Streamlit · Optuna · Docker

- Achieved AUC-ROC 0.864, KS statistic 0.521, and Gini 0.727 on held-out test data by implementing XGBoost (Chen & Guestrin, 2016) optimised via 30-trial Bayesian search (Optuna) with SMOTE oversampling and feature engineering; outperformed logistic regression baseline by 58% on AUC.
- Built a SHAP TreeExplainer (Lundberg & Lee, 2017) layer behind a FastAPI service with one-click Basel III-aligned PDF regulatory report generation, PSI-based model drift monitoring, and 39 unit tests passing across API, model validation, and monitoring modules.

Hail Mary — Stellar Anomaly Detection Engine [\[GitHub\]](#) Python · PyTorch · FastAPI · React · TimescaleDB · Redis · Docker · AWS EC2

- Achieved 94% recall on confirmed exoplanet transits by training a two-stage LSTM autoencoder + CNN classifier on 50,000+ NASA stellar light curves, with sub-200ms live inference latency via Redis-cached REST API backend.
- Deployed a full-stack React + D3.js mission control dashboard on AWS EC2 via Docker with GitHub Actions CI/CD, supporting real-time anomaly alerts and time-series visualisation.

AI-Powered Unit Test Generator Schneider Electric Inn0vex Finalist [\[GitHub\]](#) Python · TypeScript · LangChain · LangGraph · GPT-4o · Ollama · Pytest · GitHub Actions

- Reduced developer test-writing time by ~70% by building a VS Code extension using AST parsing and LangGraph-orchestrated GPT-4o + Ollama to auto-generate pytest suites, with parallel CI/CD pipelines across Jest and pytest-cov environments.

Self-Correcting IDE Agent [\[GitHub\]](#) Python · LangGraph · FastAPI · TypeScript · Ollama · Groq (Llama 3.3) · SQLite

- Reduced code logical errors by architecting a multi-agent Actor-Critic system (Ollama + Groq Llama 3.3) with tool-use and function calling for autonomous LLM drift detection and correction in real time, benchmarked on OpenAI HumanEval via a layered AST verification, heuristic rule engine, and LLM semantic analysis pipeline.

CEREBRO — Enterprise Security Platform [\[GitHub\]](#) Python · PyTorch · React · Flask · BERT · DistilBERT

- Fine-tuned BERT and DistilBERT for real-time phishing detection with a hybrid URL scanner (URLHaus + forensic DNS/SSL); engineered one-click STIX 2.1 CERT reporting with Integrated Gradients XAI, reducing analyst report time from 45 min to under 2 min.

StateScout AI In Progress Python · LangGraph · Playwright · GPT-4o Vision · Neo4j · FastAPI · Docker Compose

- Building an autonomous UI auditing system traversing 200+ app states per session via SHA-256 fingerprinting and O(1) loop prevention in Neo4j, detecting role-based access violations invisible to DOM-only tools using an MCP-style tool-orchestrated, RAG-grounded multimodal GPT-4o Vision + Playwright perception pipeline with agent memory and planning.

RESEARCH & ACHIEVEMENTS

- Published & Presented:** *Web Phishing and Email Phishing Analysis Using Tabular and Semi-Tabular Approaches* — iSMAC 2024 (PTP ID: 17282). Fine-tuned BERT/DistilBERT on tabular datasets; accepted and presented at conference.
